

WORK PERMIT APPLICATION CHECKLIST

All construction work proposed to be performed on property owned or controlled by the Board of Commissioners of the Port of New Orleans ("Board") must be authorized in writing, in advance, by the Board. Examples include new construction, repairs, alterations or modifications to existing structures or property, and installation of fences, trailers, fuel tanks, signs, etc. No application fee is assessed by the Board and all submittals required for permit application must be submitted prior to the commencement of work. The Board reserves the right to request additional information beyond that required in this application for complete review. Questions and requests for permits should be directed to the Permitting Department: (504) 528-3450, permits.dept@portnola.com.

THE ISSUANCE OF A WORK PERMIT IS NECESSARY TO ASSURE THAT:

- ♦ The work will not interfere with the Board's current or future plans for development.
- ♦ The work will not damage Board facilities or property.
- ♦ The work will not adversely affect the environmental quality of Board property.
- ♦ The work will not adversely affect insurance coverage.
- ♦ The work is accomplished in accordance with Board standards.
- ♦ A record exists of improvements to Board property and the location and routing of utilities.

TYPES OF WORK PERMITS:

- ♦ Repair (Repair or Replacement in Kind of a component of an Existing Improvement/Building)
- ♦ Renovation (Alteration of an Existing Improvement/Building)
- ♦ Demolition
- ♦ New Construction
- ♦ Site Improvements, including fill
- ♦ Utilities including:
 - Electric
 - Water
 - Sewer
 - Drainage
 - Fiber
- ♦ Fencing
- ♦ Modular Building Installation
- ♦ Rail
- ♦ Roadway
- ♦ Oversize Load
- ♦ Right of Entry
- ♦ Signage
- ♦ Above Ground Storage Tank

Distance from flood control structures

Proposed work

Contractor and Subcontractor Louisiana licenses

Permittee, Contractor and Subcontractor insurance certificates

State Fire Marshal letter of approval * See Section 3.1 BUILDING PROJECTS below

Entergy approval * See Section 3.3.2 UTILITIES below

Sewerage and Water Board of New Orleans Permit * See Section 3.3.3

Regulatory agency permits and Letters of No Objections *see sections below to determine applicability

INSURANCE MINIMUM REQUIREMENTS OF PERMITTEE'S AND CONTRACTOR'S INSURANCE:

All insurance policies shall remain in full force and effect until the completion and acceptance of the permitted work. The furnishing of insurance shall not relieve the Permittee or its contractor(s) and/or subcontractor(s) of the responsibility for losses not covered by insurance.

- ♦ Name the Board of Commissioners of the Port of New Orleans as an Additional Insured.
- ♦ Provide Commercial General Liability coverage of \$1 million.
- ♦ Provide Motor Vehicle Liability Insurance of \$1 million.
- ♦ Provide Workers Compensation Coverage of \$1 million.
- ♦ Provide a Waiver of Subrogation.

The Board reserves the right to modify amounts and types of insurance coverage depending on the type and scope of work.

BUILDING CODES: ALL CONSTRUCTION WORK MUST COMPLY WITH THE FOLLOWING:

The Louisiana State Uniform Construction Code Council (LSUCCC) <http://lsuccc.dps.louisiana.gov/codes.html> adopted 2015 International Codes and the Board adopted these codes and guidelines. This includes but is not limited to the following:

- ♦ International Building Code (IBC), 2015 Edition.
- ♦ International Existing Building Code (IEBC), 2015 Edition.
- ♦ International Plumbing Code, 2015 Edition and applicable plumbing codes of the City of New Orleans through the New Orleans Sewerage & Water Board.
- ♦ International Mechanical Code (IMC), 2015 Edition.
- ♦ International Fuel Gas Code (IFCG), 2015 Edition.
- ♦ National Electric Code (NEC), 2014 Edition.
- ♦ Louisiana State Fire Marshal – NFPA 101 Life Safety Code
- ♦ Wind Load – ASCE 7-02.
- ♦ American Concrete Institute (ACI) 318 Building Code Requirements.
- ♦ Port of New Orleans Design Resiliency Manual 2013.

OTHER REGULATORY AGENCIES:

Much work on Board property is subject to the requirements of other governmental and regulatory agencies. Generally, these permits are issued in the Board's name and the Board secures these permits for the permittee. However, it is the responsibility of permittee to determine that all necessary permits have been issued for the proposed work. Copies of any permits issued directly to the permittee by other agencies must be furnished to the Board before commencement of the work. Permittee should contact the Board's permit office to determine who should secure a permit.

Below is a list of the most common agencies involved in Board construction activity. Some agencies charge fees, which are the sole responsibility of the permittee. Unless otherwise noted, these fees must be paid to the Board and the Board then issues a check to the agency as the permit will be in name of the Board.

- ♦ U.S. Army Corps of Engineers ("USACE"): Permit required when soil borings are taken, piles are driven or other structures are constructed on the water side of the bank line, including excavation and filling (including installation of rip rap). General maintenance is covered in Port NOLA's USACE permit; therefore, Contact the Permitting Department for more information.
- ♦ South Louisiana Flood Protection Authorities East & West (Orleans, East Jefferson, or West Jefferson Levee Boards) ("Levee Board"): Permit required for all construction in their Right of Way and when a USACE permit is required. Also, a permit is required when the following is done within 1,500 feet of the Mississippi River flood protection structures or within 300 feet of the hurricane protection structures (even if it is for maintenance of a permitted structure): driving piles, soil borings, installing foundations or subsurface drainage deeper than 3', or excavation deeper than 3'. A permit is required for demolition of wharves, but not for sheds.
- ♦ DOTD - Office of Public Works: Permit required roadway construction and oversize loads on state highways.
- ♦ Coastal Management Division-DNR: Permit required when a USACE permit is required. Also, a consistency review is sometimes required when a Flood Protection Authority permit is required.
- ♦ Department of Environmental Quality: Water Quality Certification required when dredging or filling of wetlands or in flood plains.
- ♦ State Fire Marshal ("SFM"): Verify in advance if Board or tenant applies for this permit. If Board applies, permittee supplies the Board with the completed application form (in Board's name) and necessary documentation and the Board transmits them to the SFM office with a cover letter. The Board is assessed a fee for plan reviews by the SFM and full price (varies) for resubmittals. The cost of such fees shall be the responsibility of permittee.

WORK PERMIT APPLICATION CHECKLIST

- ♦ Sewerage & Water Board of New Orleans ("SWB"): All plumbing work on Board property which connects into SWB's municipal potable water supply or discharges into the municipal sewer system requires a SWB permit. The permittee applies for this permit and pays the appropriate fee to SWB. Written evidence of such SWB permit shall be submitted to the Board prior to the commencement of work, including all related correspondence.
- ♦ New Orleans Public Belt Railroad Corporation ("NOPB") - Permit required for any work located within 25 feet of the centerline of the track.

1 PROJECT NAME OR TITLE:

1.1 PROPERTY ADDRESS:

3 PROJECT INFORMATION

3.1 BUILDING PROJECTS

3.1.1 International Code Council Construction Type:

- Not Applicable
- Site Built
- Modular Trailer
- Manufactured

3.1.2 Area of existing structure: ft^2 Area affected: ft^2
 New Area added: ft^2 Number of floors:

3.1.3 Foundation type: Slab Pier

3.1.4 Existing sprinklers: Yes No Proposed Sprinklers: Yes No
 ♦ If proposed sprinklers, LA State Fire Marshal approval must be attached Attached

3.1.5 Will the building be occupied? Yes No
 ♦ If yes, LA State Fire Marshal approval must be attached Attached

3.1.6 Is this project a Change of Use of a building? Yes No
 ♦ If yes, LA State Fire Marshal approval must be attached Attached

3.1.7 Will interior walls be moved in this project? Yes No
 ♦ If yes, LA State Fire Marshal approval must be attached Attached

3.1.8 Will the exterior of the building be altered in any way? Yes No

3.1.9 Was this structure built before 1980? Yes No
 ♦ If yes, contractors required to follow OSHA Lead in Construction Rule, 29 CFR 1926.62, unless determined as negative lead content by a state certified lead inspector. Attached
 ♦ Contractor must have OSHA competent person training and LPF-2ci form on file with LDEQ

3.1.10 Is there demolition or renovation planned? Yes No
 ♦ If yes, must provide an asbestos hazard assessment conducted by a state certified asbestos inspector and submit appropriate AAC-2 form to the Port for review. File with LDEQ upon Port approval. Attached

3.1.10.1 Positive asbestos:

With Port approval, file AAC-2a form with LDEQ 10 business days prior to commencing activities

3.1.10.2 Negative asbestos:

With Port approval, file AAC-2b form with LDEQ 5 business days prior to commencing activities

3.2 SITE WORK

3.2.1 Will additional fill material be brought onto the site? Yes No

3.2.2 Any site located within a wetland or flood plain will require a Coastal Use Permit:
<http://www.dnr.louisiana.gov/index.cfm/page/93> Is the Coastal Use Permit attached? Yes No

3.2.2.1 Area of fill material:

3.2.2.2 Volume of fill material:

3.2.2.3 Type of fill material:

3.2.2.4 Is the fill Beneficial Reuse Material?

Yes No

If yes, LAC Title 33, Part VII, Subpart 1, Chapter 11 and any other applicable regulations must be followed. Attach documentation for Port NOLA Environmental review.

Attached

3.2.2.5 Type of equipment to be used to spread and compact fill material:

3.2.3 Will a driveway be installed?

Yes No

3.2.4 Will more than 1 acre of soil be disturbed?

Yes No

- ♦ If yes, LDEQ Small Construction General Permit and SWPPP required on site

Attached

3.2.5 Will more than 5 acres of soil be disturbed?

Yes No

- ♦ If yes, Notice of Intent must be filed to LDEQ for Construction General Permit and SWPPP, and maintained on site

Attached

3.2.6 Is a wash pad being installed?

Yes No

- ♦ If yes, local municipal water utility approval is required. Contact Port NOLA Environmental for details.

Attached

3.2.7 Is a fuel tank being installed permanently or temporarily for construction?

Yes No

- ♦ If yes, tank type and location must be approved by Port NOLA Environmental. Secondary containment is required, and a spill plan for capacity over 1320 gallons.

Attached

3.3 UTILITIES

3.3.1		Number of Existing Meters	Number of New Meters
	Electrical Meters:		
	Gas Meters:		

3.3.2 Will any electrical work be done under this scope of work?

Yes No

- ♦ If yes, line diagram by a licensed electrical contractor

Yes No

The Board reserves the right to require electrical plans stamped by a Louisiana licensed electrical engineer

3.3.2.1 Is there a new connection tied into Entergy service lines?

Yes No

- If yes, Entergy approval must be attached
- If yes, Entergy Account Number:

Attached

3.3.3 Will any plumbing work be done under this scope of work?

Yes No

- ♦ If yes, line diagram by a licensed plumbing contractor

Yes No

3.3.3.1 Will there be a new connection to the water/sewer?

Yes No

3.3.3.2 If yes, is the connection tied into Port NOLA or New Orleans Sewerage & Water Board main?

Port S&W

- If New Orleans S&W Board, approval must be attached

Attached

3.3.4 Will any HVAC or gas line work be done under this scope of work?

Yes No

- ♦ If yes, line diagram by a licensed mechanical contractor

Yes No

WORK PERMIT APPLICATION CHECKLIST

The Board reserves the right to require mechanical plans stamped by a Louisiana licensed mechanical engineer

3.4 FLOOD PROTECTION

3.4.1	Distance from Floodwall Structure	Ft	Flood Side	Protected Side
3.4.2	Is the project located within a wetland or waterway?			Yes No
3.4.3	Is the work located within the limits of any levee right-of-way?			Yes No
3.4.4	Is there soil penetration of more than 36" within 300' of IHNC Flood protection structure?			Yes No
♦	If yes, application for Flood Protection Authority must be attached for submission by Port NOLA			Attached
3.4.5	Is there soil penetration of more than 36" within 1500' of Mississippi River Flood protection structure?			Yes No
♦	If yes, application for Flood Protection Authority must be attached for submission by Port NOLA			Attached

3.5 CONTRACT

Estimate cost/value of proposed work \$

♦	Attach quote, contract, or other documentation of estimate.	Attached
