Issued - January 30, 2015

Effective - February 1, 2015

A special incentive dockage rate of \$100 per vessel shall be assessed in lieu of the normal applicable dockage rate shown in Item 418 for the first twenty (20) vessel calls for vessels owned, operated or chartered by a single shipping line or multiple shipping lines in a joint operating agreement or alliances which have initiated a new weekly container service subject to the following conditions:

The first twenty (20) vessel calls for which the incentive rate has been assessed may not be used to satisfy the minimum requirements for any other special dockage incentives provided for in Item 417.

After the initial twenty (20) vessel calls for the purpose of loading and discharging container cargo to a facility owned by this Board, the shipping line(s) may then utilize any special vessel dockage rate provided for in Item 417 for which it may otherwise qualify.

A new service for purposes of this item is one that has not called a facility owned by this Board during the 24 months preceding the initial call for which this item is applicable. A change in the rotation of ports of call of an existing service or changing/adding vessels in an existing service does not constitute a new service.

INCENTIVE DOCKAGE RATES 417

Issued January 27, 2017 Effective February 1, 2017

Vessel Calls

A special **Vessel Call** dockage rate equal to 75 percent of the normal applicable dockage rate shown in Item 418 shall be assessed against vessels utilizing assigned berths for loading and/or unloading of cargo and which satisfy the requirements set forth below.

- Special Vessel Call dockage rate shall apply to all vessels owned, operated or chartered by a shipping line, but only after 49 of the line's vessels have loaded or discharged cargo at a public facility of this Board within twelve (12) months following the date of notification as set forth below.

- The vessel owner or agent shall within thirty (30) days following the departure of the vessel provide a report in a form acceptable to the Board showing the vessel names, dates of call and tonnage of cargo handled to support that the above criteria have been met.

A shipping line may avail itself of either incentive dockage rate, but not both.

Vessel owners or their agents shall notify the Board in writing of their interest in and intention to avail themselves of this provision and specify which special dockage rate they are requesting.

Only Vessels assigned berths for which dockage is assessed pursuant to Item 418 may be utilized to satisfy the minimum requirements above.

A shipping line may specify the charges to which it would like the credit applied. Credits equal to the discounts earned shall be applied against dockage charges, harbor fees and port security charges assessed after the applicable minimum requirements described above have been reached. Credits shall

be applied to the aforementioned charges assessed beginning with the next vessel after the threshold requirements have been met, but not later than the end of the 12 month period following the one in which they were earned, and in no event shall cash payments be made.

COMPUTATION OF DOCKAGE 420

Issued - March 1, 1997 Effective - April 1, 1997

Part Day Dockage Charges

Vessels shall be assessed one full day's dockage for the first day regardless of the number of hours berthed. After the first day's charges, vessels shall be assessed 50 percent of full day dockage charges for under 12 hours and 100 percent for over 12 hours.

Alternative Basis for Computing Dockage Charges

In the event a vessel, after discharging her inward cargo, and/or lifting part of her outward cargo, departs for other United States Gulf ports, and returns to this port to lift the remaining outward cargo left behind, classified as shut-out cargo (see Items 446 and 448), or additional outward cargo received subsequent to her departure, dockage charges may be computed as if there were two separate and distinct vessels involved, if the total dockage charges resulting thereby are lower than the regular dockage rate computed on the basis of the continuous and uninterrupted running time, provided in Item 414.

When the charges are assessed under this alternative basis, such vessel shall be required to submit separate applications for berths to cover both such arrivals or voyages. In such case, the date originally assigned to the vessel to receive cargo shall be deemed to be the receiving date of the vessel for determining the charges for her second or return voyage, except that in the event such vessel receives additional cargo after departing this port for another United States Gulf port, then a new receiving date shall be assigned to her, beginning on the day such additional cargo is so received.

SHUT-OUT CARGO DEMURRAGE CHARGES 448

Issued – November 1, 2015 Effective – January 1, 2016

The demurrage charges for shut-out cargo are \$0.25 per ton for each five-day period, or fraction, based on the tons of cargo shut-out by the vessel. The vessel shutting out cargo, her owners, charterers and agents shall be responsible for the payment of said charges. The charges shall commence the day after the vessel shutting out the cargo departs from her assigned berth and will cease on the date the lifting vessel begins receiving her additional cargo, or on commencement of her regular dockage charges. If total shut-out demurrage charges do not exceed \$17.34, they shall be waived.

Within five days following the departure of the vessel shutting out cargo, the VESSEL shall render to the Board a statement, properly certified, showing the weight and description of all such cargo shut-out by the vessel and such other information prescribed in Board forms for the purposes of computation and public records.

Exception Vessels shutting out cargo of 200 tons or less shall be exempt from the shut-out demurrage charge provided said cargo is not shut-out a second time, the cargo does not remain on the wharves for more than 30 days after the departure of the ship for which it was first received, and the cargo does not involve expense to the Board or interfere with the efficient operation of the Board's property.

On the thirty-first day after the departure of vessels shutting out cargo, the shut-out demurrage charge shall be assessed.
